

## **INTEGRATING COMPUTERS INTO SUNDAY SCHOOL**

Q: Can anyone direct me to curriculum/materials/ideas on how to integrate computers into Sunday Church School Christian education? Our congregation does not want to use computers just for the sake of using them but to integrate computers into the fabric of our teaching, especially with the youth. Thanks.

A: The best resource around is to connect with [sundaysoftware.com](http://sundaysoftware.com). Neil MacQueen, author of Computers, Kids and Christian Education, is the owner of that company and he's a wealth of info. He and his team carefully search for all the best software for kids and youth.
